Note. The absolute amount of public recurring expenditure on education (in national currency) is indicated in this table. This enables the reader to see on which absolute amount the percentage distribution is based.

"Second level" covers general, vocational and teacher training; "Other types of education" includes special education, adult education and literacy, religious schools and similar institutions. The column "Other expenditures not allocated by level" covers scholarships, subventions and all other types of expenditure which have not been specified.

1. Expenditure of the Ministry of Education only.
2. Including capital expenditure.
3. Expenditure for administration is distributed amongst the different levels and types of education.
4. Expenditure of the Central Government only.
5. Including scholarships and grants to students.
6. Scholarships and grants to students.
7. Expenditure for special and adult education is distributed amongst different levels and types of education.
8. Expenditure for administration is included with "Other expenditures not allocated by level".
9. Not including public expenditure on private education.

Note. Grade-sex enrolment data for the first level of education are presented in this table, and for general education at the secon level in Table 47.

The grade-enrolment distribution is presented according to the national systems of education of the countries concerned. In particular, it should be noted that the structure of educational systems by levels and stages of education, and duration of schooling, vary from country to country. In interpreting the data, therefore, tables 46 and 47 should preferably be considered together. As far as possible data are presented year by year from 1950 onwards.

It will be noted that these tables do not include enrolment data in respect of vocational and technical education, and teache training at the second level. This limitation in coverage ought to be borne in mind in using these tables for the calculation of, for example, retention and transition ratios. This is particularly important when making inter-country comparison in view of the varying proportion of students who at various points, according to the education system, may switch from the

46. Enrolment by grade and sex at the first level of education (continued)

general to the vocational and teacher training streams, or go out of the system after completing a specified stage at the school level.

1. Prior to 1964 Village Schools are not included. In 1964, enrolment by grade in Village Schools was as follows:

	Total	I	II	III	IV	V	VI
Both sexes	69 151	30 789	22 141	15 723	436	59	3
Girls	8 064	3 869	2 507	1 645	33	10	-

2. Data refer to Burma Proper only.

3. Public education only.

4. Excluding enrolment in schools run under the Education Corps Programme. In the school year 1969-70, enrolment in these schools was as follows:

	Total	I	II	III	IV	V	VI
Both sexes	321 239	121 084	66 859	48 901	37 760	30 598	16 037
Girls	65 065	31 961	13 703	8 330	5 412	4 105	1 554

5. Enrolment in Primary grades VII and VIII in Evening Schools (6 404 pupils in 1967) is included with grade VI.

6. Total includes enrolment in "Cours des certifiés" a supplementary class where primary school graduates can prepare for the entrance examination to secondary school. Enrolment in this class is shown in parenthesis under grade VI.

7. Beginning 1966, grade IA was abolished and grade IB became grade I.

47. Enrolment by grade and sex in general education at the second level

47. Enrolment by grade and sex in general education at the second level (cont'd)

Note : Reference should be made to the Note to Table 46.

1. Secondary education is on two levels: middle school (grades VII-IX), and the full secondary school or "Lycée" (grades X-XII).

2. Burma proper only.

3. Public education only.

4. At the end of grade X the national General Certificate of Education (G.C.E.), Ordinary Level, is held and promotion to grade XI is based on the acquisition of a combination of credit passes at this examination. The G.C.E., Advanced Level, is held at the end of grade XII.

5. Secondary education is in two stages; junior high schools (grades VII-IX), and senior high schools (grades X-XII). Since 1968, compulsory education was extended to 9 years, covering primary (6 years) and junior high school (3 years).

6. The patterns and duration of school education differ from State to State. For the purpose of enrolment statistics, grades I-V are considered primary education and grades VI and above, secondary education. It should be noted that grade XI and, particularly grade XII, apply to certain States only.

7. Secondary education is divided in two cycles: first cycle (grades VII-IX), and the second cycle (grades X-XII), which has four branches: natural science, mathematics, literature and home economics.

8. Lower secondary school (grades VII-IX) completes the period of compulsory education: upper secondary school comprises grade X-XII for full time education plus one extra year (grade XIII) for part-time courses.

9. The "Diplôme d'études secondaires du premier cycle" (lower secondary school certificate) is conferred on completion of the first stage of secondary education (grades VII-X); the "baccalauréat de l'enseignement secondaire" is taken in two parts, the first after two years (grades XI-XII), and the second after the third year of the upper stage (grade XIII).

10. For the years 1953-1961: including Vocational/Technical education and Teacher training.

11. Secondary education is on two levels: middle school (grades VII-IX), and high school (grades X-XII). Upon completion of grade IX, in addition to those students continuing in grade X in general high schools, there is a large number who enrol in vocational high schools.

12. Figures shown in parenthesis in colum headed "grade VI", correspond to the "Bridge (or remove or transition)" classes, providing one or two years intensive English to prepare pupils from Chinese primary schools for entry in English-medium secondary schools.

13. Secondary education is on three levels: lower secondary (grades VII-IX); upper secondary (grades X-XI): and 2-years of lower-and-upper sixth form (grade XII).

14. Including the "Bridge" class (see note *12* above).

15. Secondary education is divided into junior secondary and senior secondary. Chinese schools are often described as "middle" schools. Enrolment is classified as follows:

47. Enrolment by grade and sex in general education at the second level (cont'd)

Grade shown in this table	National classification*	
	Prior to 1967	Beginning 1967
VI .	Transition class	Transition class + JM 1
VII	Form 1 + JM 1	Form 1 + JM 2
VIII	Form 2 + JM 2	Form 2 + JM 3
IX	Form 3 + JM 3	Form 3 + SM 1
X	Form 4 + SM 1	Form 4 + SM 2
XI	Form 5 + SM 2	Form 5 + SM 3
XII	Form 6 (LU) + SM 3	Form 6 (LU)

* Transition class: provides one year of intensive English to prepare pupils from Chinese primary schools for entry in English-medium secondary schools.

Form 1-6 : applies to English-medium schools.

JM 1-3, SM 1-3 : applies to Junior Middle and Senior Middle Schools.

(LU) : Lower-and-Upper Sixth Form.

16. Figures shown in parenthesis under grade VI correspond to the "remove" class providing one year of intensive English to prepare pupils from primary schools, using Malay, Chinese and Tamil as medium of instruction, for entry into English-medium-secondary schools. Similarly, for entry into Malay-medium secondary schools, children go to "remove" class to learn Malay.

17. Secondary education is on two levels: incomplete secondary schools (up to grade VII), and complete secondary schools (up to grade X).

18. Figures presented in this table are official estimates based on a varying proportion (70-85%) of reporting schools.

19. Prior to 1962, data include vocational education (67 000 students in 1962). Grades XI-XII, apply to night schools only.

20. Including vocational and technical education.

21. For the years 1954-60, enrolment in grade VII of Malay-medium, and Tamil-medium primary schools, is included in this table under grade VII. Grade VII in those schools was abolished beginning 1961.

22. Figures in parenthesis shown under grade VI refer to the "post-primary classes 1 and 2" which were in operation between 1960-1965.

23. Secondary education is on two levels: lower secondary (grades VIII-X); upper secondary (grades XI-XII), with branches for science and arts.

24. Secondary education is on two stages: the first cycle (grades VI-IX) is sanctioned by the "brevet d'études du premier cycle" (lower general secondary certificate). In the second cycle, the first part of the baccalaureat takes place after two years (grades X-XI); followed by an extra year for the second part.
